Wheelwise Engineering

Website Privacy Policy

Introduction

The policy defines the personal information that this website collects, why we collect it and how we protect it.

About This Website

The website is hosted by Dreamhost under a shared hosting package contract. This means that the website software runs on shared Dreamhost owned servers, which are accessed via our individual domain and is stored on a separate partition of the hard drive space. A major advantage of this arrangement is that Dreamhost takes responsibility for maintenance, repair and updating tasks and for the security of the website data.

The website is built using the widely-used, open-source software package, WordPress. This (together with the website “theme” software and any associated plugins) is updated on a regular basis to maintain protection against new security threats. For additional security, the website software is regularly backed up using a premium plugin and stored in a personal Dropbox account.

How We Store and Use Your Personal Information

This site uses Jetpack by WordPress.com to track user visits and determine the number of people accessing our site, which pages are most popular and how the number of visits varies over time. None of the collected data personally identifies you.

Jetpack may make use of cookies to log which pages you visit but this can be disabled within your internet browser.

Data Breaches

We will report any loss of personal information to all relevant parties within 72 hours.

v1.0

Data Removal

If you wish your personal information to be deleted, please send a request to the Webmaster at neil.williamsceng@btinternet.com.
